DHRUV GOEL

+91-7827120792 dhruvgoel2206@gmail.com LinkedIn GitHub

EDUCATION

Guru Tegh Bahadur Institute of Technology, GGSIPU
*B.Tech - Information Technology - **CGPA – 8.06***
Sri Guru Nanak Public School , SGNPS
class 12th – **85%** | class 10th – **73%**

TECHNICAL SKILLS

Programming & Development: C++, JavaScript, Python, Node.js, React, MongoDB, Postgres, Flask
Data Analysis & Tools: MS Excel (VLOOKUP, Pivot Tables), Word, PowerPoint, Postman
Process Documentation: MS Visio for flowcharts and data/process modeling
Other Tools: GitHub, Chrome DevTools, Figma, Vercel, Railway, Gemini API, Streamlit

INTERNSHIP

House Of MarkTech (HOM) | Backend Intern **14th May 2025- 27th June 2025**

- Developed and integrated RESTful APIs using Node.js, Express.js, and MongoDB.
- Implemented JWT authentication and role-based authorization for secure user access.
- Collaborated with frontend developers to connect APIs with React.js applications.
- Utilized Git for version control, Postman for API testing, and MongoDB Atlas for cloud database management.

PROJECTS

Email Categorizer | [GitHub Link] | [Live Link] **AUG 2025**

- **Tech Stack: MongoDB, Express.js, React.js, Node.js, Elasticsearch, Docker**
- Designed and implemented a MERN-based application that automatically **classifies and organizes emails** into categories (Work, Personal, Promotions, Spam) using **Elasticsearch** for high-performance text search, filtering, and indexing.
- Built robust RESTful APIs in **Node.js/Express.js** for email ingestion, classification, and retrieval, with **MongoDB** as the primary datastore to ensure persistence and scalability.
- Developed an **interactive React.js dashboard** with advanced search and filtering features powered by Elasticsearch, enabling users to easily manage, explore, and analyze categorized emails in real time.

Markdown Editor (Markify) - Personal Project | [GitHub Link] | [Live Link] **MAR 2025**

- Tech Stack: React, JavaScript, Node.js, Express.js, MongoDB, JWT, Passport.js, RESTful API, Tailwind CSS MARCH 2025
- Engineered a full-stack web application to create, save, and download Markdown files, providing users with a streamlined content creation tool similar to GitHub's editor.
- Implemented a secure RESTful API with Node.js and Express.js, incorporating JWT and Passport.js for robust user authentication and authorization to protect user data.
- Architected a scalable MERN stack application and deployed on Vercel/Render, achieving 99.9% uptime and ensuring a responsive, high-performance user experience.

Cura - Health Management PWA| [GitHub Link] | [Live Link] **JULY 2025**

- **Tech Stack: Python, Streamlit, Flask, SQLite3, PWA, Render, Streamlit Cloud**
- Architected a decoupled application with a Streamlit PWA frontend hosted on Streamlit Cloud and a Python (Flask) backend API hosted on Render.
- Built and deployed a lightweight Flask API on Render to serve as the backend, handling all CRUD operations and business logic with an SQLite3 database.
- Developed an interactive UI with Streamlit that consumed the backend API, enabling users to manage health data through a responsive and installable web application.

ACHIEVEMENTS

- **Core team member of the ETC Dramatics Society, contributing to 10+ performances and events. Collaborated on scriptwriting, direction, and stage management to deliver engaging productions for audiences of 50+**
- Completed **Udemy course** for skill development in fields of **Frontend Web Development and REST API handling** in 3 months, with a strong focus on the curriculum.
- **Currently enrolled in a Masterclass DSA course** at Coding Blocks, Pitampura, focusing on **Data Structures and System Design**, while solving **300+ problems** on **LeetCode** to strengthen problem-solving skills.

CERTIFICATIONS & COURSES

- The Complete Full-Stack Web Development Bootcamp
- Master Data Structures and Algorithm using C++ by Coding Blocks 350+ DSA questions
- IBM Skill Build Agentic AI: From Learning to Builder

July 7th, 2025

To Whom It May Concern:

I am pleased to recommend Dhruv Goel, who worked with us at House of MarkTech as a Backend Developer Intern for a period of 45 days.

Dhruv contributed to the IntoTheWildStays project, working closely on backend logic, especially for the property page module. He also supported maintenance and debugging tasks across other internal projects, including the House of MarkTech platform.

Dhruv demonstrated strong backend fundamentals, stayed accountable for assigned tasks, and communicated clearly with the frontend team. His ability to manage APIs, fix bugs, and maintain clean, structured code was consistent and reliable throughout the internship.

I believe he has a solid foundation in backend development and is well-equipped to grow further in any technical environment. Please feel free to contact me if any additional information is required.

BYPRODUCT VENTURES LLP 2025

Best regards,

Shidharth Ganguly
