EDUCATION

Guru Tegh Bahadur Institute of Technology, GGSIPU, Delhi
*B.Tech - Information Technology - **CGPA - 8.2***

TECHNICAL SKILLS

Languages & Core: C++, JavaScript, Python | Data Structures & Algorithms, REST APIs, JWT, RBAC
Frontend & Backend: React.js, Next.js, Node.js, Express.js, Django, Flask
Databases & Tools: MongoDB, PostgreSQL, SQLite, Elasticsearch, Docker, Git, Postman, Vercel, Railway, Streamlit
DevOps: CI/CD Pipelines, Git, Docker, AWS, Linux, Jenkins, GitHub Labs

EXPERIENCE

Stirring Mind | FullStack Intern **FEB 2026 - ON GOING**

- Developed full-stack features including secure user authentication and an advanced property search/filtering system for a coworking rental platform.
- Built RESTful APIs with Node.js and TypeScript to manage real-time booking availability, ensuring data consistency between the Next.js frontend and MongoDB backend
- Optimized platform performance by streamlining database queries and integrating responsive UI components to enhance user experience.

Plutonic Services Pvt. Limited | Frontend Intern **SEP 2025 - FEB 2026**

- Assisted in developing and maintaining responsive user interfaces using React.js, Next.js, Ant Design, and TailwindCSS, ensuring cross-browser compatibility and mobile responsiveness.
- Collaborated with senior developers to integrate REST APIs and optimize application performance for a seamless user experience.
- Gained hands-on experience in version control (Git/GitHub) and agile workflows while contributing to real-world client projects.

PROJECTS

Flash Space | Internship Project **FEB 2026**

- **Tech Stack: Next.js, Node.js with TypeScript, and MongoDB.**
- Architected 27 RESTful API modules in Node.js/TypeScript — covering virtual offices, coworking spaces, meeting rooms, payments, KYC, invoices, notifications, affiliates, and coupons — with role-based access control securing partner-owned resources across admin, partner, and client roles.
- Built a 4-step Next.js booking wizard with coupon validation, multi-tenure discount pricing, and a real-time seat-hold countdown timer (cron-based expiry + atomic confirmation on payment) to prevent double-bookings in the coworking day-pass flow.

CA Cloud Desk | Internship Project **JAN 2026**

- **Tech Stack: Built the application using Next.js (React) for the frontend and Python (Django/Django REST Framework).**
- As the sole frontend developer, built a comprehensive practice management portal for Chartered Accountants, architecting a Next.js interface that integrates core tools including document management, automated agreement generation, Tally integration, and a training hub.
- Engineered dynamic dashboards and client-facing modules to streamline workflows for tax professionals, featuring robust security callouts (AWS) and seamless navigation between complex features like customer management and collaboration communities.

Synova | Internship Project **NOV 2025**

- **Tech Stack: Built the application using Next.js (React) for the frontend and Python (Django/Django REST Framework).**
- Architected the complete frontend of a financial investment portal from the ground up using Next.js, establishing a scalable component library and state management structure that supports complex data visualization for unlisted shares.
- Engineered dynamic, data-driven interfaces including a live proprietary market index (SEEDEX 15), integrated news/blog feeds, and interactive FAQ sections—ensuring seamless performance and responsive design across all devices.
- Translated complex financial concepts into intuitive user experiences by building a clean, professional UI that showcases company valuations, expert analysis, and investor testimonials—driving user engagement and trust in the platform.

ACHIEVEMENTS

- Completed Udemy course for skill development in fields of Frontend Web Development and REST API handling in 3 months, with a strong focus on the curriculum.
- Solved 300+ DSA problems on coding blocks platform and LeetCode combined.

CERTIFICATIONS & COURSES

- Master Data Structures and Algorithm using C++ by Coding Blocks 350+ DSA questions **AUG 2025**
- IBM Skill Build Agentic AI: From Learning to Builder **AUG 2025**
- The Complete Full-Stack Web Development Bootcamp by Angela Yu **NOV 2024**
